

## Our guide lines.

---

Benefit for our customers is the main focus of our daily thinking and doing.

Pleasure and enthusiasm on technical innovations of all kind, development, optimization and full scale realization is our driving force.

Successfully implemented projects and reliable and robust working production plants are the personal satisfaction of our staff.

## Our bench mark and advantage

---

- The focus on the manufacturing technologies as the key for innovative and robust production processes guarantees high throughput with high yield and low residues. This is the prerequisite for optimized direct manufacturing costs.
- Exclusively high skilled chemical engineers and industrial architects with long years of international experience ensure reliable benefit for our challenging projects.

## What we can show

- Nearly all of our projects protect our company know as well as the intellectual property (IP) of the client by tight secrecy agreements. However this is mostly limited to the relevant industrial area.

---

## Our success story

---

Immediately after the founding of the company in the year 2001 through Dipl.-Ing.(Univ). Franz Wenzl a process to extract proteins out of sweet lupins was industrialized. This was followed by development projects and industrial scale projects in the areas Pharma, MedTec, Food, Energetics and glass applications.

---

## This is what our clients say:

---

*„By using **bio. Contracting GmbH** we succeeded to achieve the nearly impossible and started a new production plant with new and innovative technologies in time, on budget and in between the required quality limits.“*

- Reinhard Endt – Hochwald Foods GmbH

*„Never before we experienced a consulting and engineering company that silently but successfully implemented newest technologies in shortest possible time.“*

- Kurt Ryf – Rheinmetall AG

---

## Our services:

---

- Technology consulting
- Technology optimization
- Engineering
- GMP

## Our clients:

- Hochwald Foods
- B. Braun AG
- Clariant AG
- For Life
- Rheinmetall AG
- Biogas Hochreiter
